KEY INSIGHTS

- **Average Steam game rating remains high at 84.95%.**
- **Cheap games receive the highest average ratings (85.76%), while Premium games receive the lowest ratings (78.05%).**
- **Price and rating exhibit a weak negative correlation (-0.12), indicating higher prices do not necessarily result in better ratings.**
- **Discount categories show similar average ratings, suggesting discounts have limited impact on player satisfaction.**
- **Games with larger review volumes generally maintain strong ratings, reflecting higher player engagement and trust.**

Discount Cate...: Heavy Disc..., Moderate ..., No Discount

KEY INSIGHTS

- **Only 3.71% of Steam games are discounted, indicating that most titles are sold at their original price.**
- **The average discount offered is 2.09%, suggesting that discounts are concentrated among a relatively small portion of games.**
- **Premium-priced games receive the highest average discount (27%), compared to Medium-priced games (4%) and Cheap games (2%).**
- **Average player ratings remain consistently high across all discount categories, indicating that discount levels have limited influence on overall player satisfaction.**
- **A small number of developers contribute a significant share of total game releases, highlighting the presence of highly active developers within the Steam marketplace.**
